Summary

IT support and systems administration professional with over three years of experience resolving technical issues for users in banking and government. Microsoft Azure Administrator (AZ-104) certified, with hands-on experience in Windows Server, Active Directory, Microsoft 365 and VMware, plus server and network monitoring, preventive maintenance and VoIP phone setup (SIP and Microsoft Teams). Clear communicator who documents fixes, explains technical issues in plain language, helps users solve common problems themselves and works well in shift-based support teams.

Experience

Uganda Bureau of Statistics (UBOS), IT Officer — Kampala, Uganda — Feb 2024 – present

- Provide day-to-day IT support to staff, troubleshooting hardware, software and network issues.
- Carry out scheduled preventive maintenance of computers, servers and network equipment so that faults are caught before they affect staff.
- Worked with the IT team to set up and configure Yealink IP phones on the office PBX, registering SIP accounts and setting up the Microsoft Teams option.
- Monitor server and network performance and availability, escalating and resolving issues to keep services running.
- Implement firewall policies and test them to confirm they are working correctly and as intended.
- Manipulate data using Python and analyse it in Power BI dashboards and Stata; develop Survey Solutions (CAPI) questionnaires and monitor data collection as it happens.

LOLC Unguka Bank, System Administrator — Kigali, Rwanda — Apr 2023 – Jan 2024

- Handled support requests from head office and remote branch staff through the osTicket helpdesk, explaining fixes in plain language and sharing short practical guidance so staff could solve common issues themselves.
- Administered Office 365 email and collaboration tools organisation-wide.
- Managed Active Directory user accounts and VMware virtualisation across Windows and Linux environments.
- Installed, configured and maintained computer systems, software and peripherals; supported domain joining and full deployment of new machines.
- Monitored network devices and licence compliance using Zabbix.
- Led the implementation of Privileged Access Management (Sectona PAM), making administrator access to critical banking systems individually accountable and auditable.
